

Further fatality after serious industrial accident at Aurubis in Hamburg

Hamburg, May 12, 2023 – Following a serious industrial accident at multimetal company Aurubis' plant in Hamburg at around 2:30 a.m. on May 11, 2023, one more worker has succumbed to his injuries in the hospital yesterday evening. Immediately following yesterday's accident, a first worker died shortly after arriving at the hospital. A third worker remains hospitalized and continues to be in critical condition. The colleagues who provided first aid on site are receiving counseling.

A nitrogen leak occurred during regular maintenance at the RWO. The three Aurubis employees were directly affected. Rescue workers and the Plant Fire Department were immediately deployed. At no time was there any danger to the neighbors or the environment.

"We are extremely saddened by this tragic accident," Aurubis CEO Roland Harings said. "Our heartfelt sympathy goes out to their loved ones for this terrible loss we all share. We are doing everything in our power to assist their families at this difficult time and offer them our full support."

Aurubis is working closely with the authorities as they conduct a complete and detailed investigation into the root cause of the accident. An update will be provided soon as the investigation is complete and reliable information is available.

Aurubis - Metals for Progress

Aurubis AG is a leading global provider of non-ferrous metals and one of the largest copper recyclers worldwide. The company processes complex metal concentrates, scrap metals, organic and inorganic metal-bearing recycling materials, and industrial residues into metals of the highest quality. Aurubis produces more than 1 million tons of copper cathodes annually, and from them a variety of products such as wire rod, continuous cast shapes, profiles, and flat rolled products made of copper and copper alloys. Aurubis produces a number of other metals as well, including precious metals, selenium, lead, nickel, tin, and zinc. The portfolio also includes additional products such as sulfuric acid and iron silicate.

Sustainability is a fundamental part of the Aurubis strategy. "Aurubis responsibly transforms raw materials into value" – following this maxim, the company integrates sustainable conduct and business activities into the corporate culture. This involves a careful approach to natural resources, responsible social and ecological conduct in everyday business, and sensible, healthy growth.

Aurubis has around 7,100 employees, production sites in Europe and the US, and an extensive distribution network around the world.

Aurubis shares are part of the Prime Standard Segment of the German Stock Exchange and are listed in the MDAX, the Global Challenges Index (GCX), and the STOXX Europe 600.
